3M Scotch-Grip[™] High Performance Contact Adhesive 1357 • 1357 Neutral • 1357-L

Technical Da	ta			August, 2005		
most rubber, cl		Grip [™] High Performance Contact Adhesive 1357 can be used to bond loth, metal, wood, foamed glass, paper honeycomb, decorative plastic many other substrates.				
Features	Long bonding	Long bonding range.				
	• Excellent in	itial strength.				
	• High heat re	esistance.				
	Meets specified	• Meets specification requirements of MMM-A-121 and MIL-A-21366.				
Typical Physical Properties	veneers. It is a and industry g Note: The follo	to thoroughly test any a lso recommended to foll uidelines. Diving technical informati al only and should not be	ow the veneer manufact	turers recommendation		
	Product	3M™ Scotch-Grip™ 1357	3M™ Scotch-Grip™ 1357 Neutral	3M™ Scotch-Grip™ 1357-L		
	Viscosity (approx.):	200-450 cps	200-450 cps	35-65 cps		
	Brookfield Viscometer:	RVF #2 Sp. @ 20 rpm @ 80°F (27°C)	RVF #2 Sp. @ 20 rpm @ 80°F (27°C)	RVF #1 Sp. @20 rpm@80°F (27°C)		
	Solids content (by wt.):	23 - 27%	23 - 27%	17 - 19%		
	Base:	Polychloroprene	Polychloroprene	Polychloroprene		
	Color:	Gray/Green	Yellow	Gray/Green		
	Net weight (approx.):	6.6 - 7.0 lbs./gal.	6.6 - 7.0 lbs./gal.	6.6 - 6.8 lbs./gal.		
	Flash point (T.C.C.):	-14°F (-26°C)	-14°F (-26°C)	-14°F (-26°C)		
	Solvent:	petroleum distillate, acetone, MEK, toluene, n-hexane	petroleum distillate, acetone, MEK, toluene, n-hexane	petroleum distillate, acetone, MEK, toluene, n-hexane		
	Coverage (approx.) @ 2.5 gms (dry wt.)/ft. ² :	308 ft.²/gal.	308 ft.²/gal.	219 ft.²/gal.		
	Suggested Application Method(s):	Spray, brush, roll or flow	Spray, brush, roll or flow	Automatic spray		

Scotch-Grip[™] High Performance Contact Adhesive 1357 • 1357 Neutral • 1357-L

Handling/Application	Directions For Use:
Information	 Surface Preparation: Remove all dust, dirt, oil, grease, wax, loose paint, etc. Wiping with solvent such as 3MTM Scotch-GripTM Solvent No. 3 or Methyl Ethyl Ketone (MEK) will aid in preparing the surface for bonding.*
	2. Application Temperature: For best results the temperature of the adhesive and surfaces to be bonded should be at least 65°F (18°C). If stored below 30°F (-1°C), warm-up to room temperature in a warm room only (do not exceed 120°F (49°C) followed by thorough agitation).
	3. Application: Stir or agitate well before using for optimum results. Apply 2.5 gms to 3.5 gms/ft. ² dry weight to each surface. Unusually porous surfaces will require more adhesive.
	4. Drying Time: The adhesive dries in about 10 minutes. High humidity will slow drying-high temperatures speed the drying. This adhesive has a bonding range of approximately 30 minutes when applied to both bond surfaces under conditions of 70°F (21°C) and 35% R.H. If the adhesive becomes too dry, apply another thin coat of adhesive to one surface, allow to become slightly tacky, and bond.
	Relative humidities above 50% can cause blushing (condensation of moisture on surface) and a false bond. To avoid this, we recommend a force drying temperature of 180-220°F (82-104°C). Force drying will also help remove the solvent more rapidly.
	5. Assembly: Spacers, such as dowels or strips of laminate, may be used to help prevent premature adhesive/adhesive contact and bonding prior to positioning. Slide out of the spacers and apply uniform pressure, working toward the edges. A 3 in. roller used with maximum body pressure should be used to help ensure adequate contact and bonding, especially on edges. The use of a pinch roll is preferred for optimum performance. Bonded assemblies may be machined, trimmed, etc. immediately after bonding.
	6. Cleanup: Adhesive residue of 3M TM Scotch-Grip TM High Performance Contact Adhesive 1357, 1357 Neutral and 1357-L may be removed from exposed surfaces with solvents such as 3M TM Scotch-Grip TM Solvent No. 3, Methyl Ethyl Ketone (MEK), or 3M TM Citrus Base Industrial Cleaner.* For flushing fluid lines use Scotch-Grip Solvent No. 3, or MEK.
	*When using solvents, extinguish all ignition sources, including pilot lights, and follow the manufacturer's precautions and directions for use.

Scotch-Grip[™] High Performance Contact Adhesive 1357 • 1357 Neutral • 1357-L

Application EquipmentAppropriate application equipment can enhance adhesive performance. WeSuggestionssuggest the following application equipment for the user's evaluation in light of
the user's particular purpose and method of application.

1. **Pumping:** A 2:1 divorced design pump is suggested. All material hoses should be nylon or PVA lined. Packings and glands in contact with the adhesive should be Teflon[®].

2. Spray:

Spray Applicator	Air Cap	Fluid Tip	Air Pressure	Approximate Air Requirement*	Fluid Flow**
DeVilbiss JGA, MSA	777	FX (.042")	80 psi	181/2 CFM	6 fl. oz./min.
Binks No. 95 or 2001	63PH	63BSS (.046")	80 psi	23 CFM	6 fl. oz./min.

These adhesives are not recommended for Airless Spraying.

*5 H.P. Compressor for continuous use.

**To Measure Fluid Flow: Pressurize fluid source only; pull trigger, flow material into measuring device for 60 seconds, increase or decrease fluid source pressure to obtain desired fluid flow.

3. Brush/Roller: Typical brushes/rollers designed for oil-based paint may be used.

Typical Adhesive Performance Characteristics
